

Fundamentals of Kalman Filtering A Practical Approach

By Paul Zarchan, Howard Musoff

Table of Contents

Navtech Part # 1145

Preface	ix
Acknowledgments	xv
Chapter 1. Numerical Basics	1
Introduction	1
Simple Vector Operations	1
Simple Matrix Operations.....	3
Numerical Integration of Differential Equations.....	13
Noise and Random Variables.....	19
Gaussian Noise Example	23
Calculating Standard Deviation	26
White Noise	28
Simulating White Noise	30
State-Space Notation.....	33
Fundamental Matrix	34
Summary.....	38
References	38
Chapter 2. Method of Least Squares	41
Introduction	41
Overview.....	41
Zeroth-Order or One-State Filter.....	42
First-Order or Two-State Filter	46
Second-Order or Three-State Least-Squares Filter	50
Third-Order System	56
Experiments with Zeroth-Order or One-State Filter	59
Experiments with First-Order or Two-State Filter.....	64
Experiments with Second-Order or Three-State Filter	71
Comparison of Filters	78
Accelerometer Testing Example	80
Summary.....	89
References	90
Chapter 3. Recursive Least-Squares Filtering	91
Introduction	91
Making Zeroth-Order Least-Squares Filter Recursive	91
Properties of Zeroth-Order or One-State Filter	93
Properties of First-Order or Two-State Filter.....	103
Properties of Second-Order or Three-State Filter	112
Summary.....	124
References	128
Chapter 4. Polynomial Kalman Filters	129
Introduction	129
General Equations	129
Derivation of Scalar Riccati Equations	131

	Polynomial Kalman Filter (Zero Process Noise)	134
	Comparing Zeroth-Order Recursive Least-Squares and Kalman Filters	136
	Comparing First-Order Recursive Least-Squares and Kalman Filters	139
	Comparing Second-Order Recursive Least-Squares and Kalman Filters	142
	Comparing Different-Order Filters	148
	Initial Covariance Matrix	151
	Riccati Equations with Process Noise.....	155
	Example of Kalman Filter Tracking a Falling Object	159
	Revisiting Accelerometer Testing Example	171
	Summary.....	179
	References	182
Chapter 5.	Kalman Filters in a Nonpolynomial World	183
	Introduction	183
	Polynomial Kalman Filter and Sinusoidal Measurement.....	183
	Sinusoidal Kalman Filter and Sinusoidal Measurement	194
	Suspension System Example	203
	Kalman Filter for Suspension System.....	207
	Summary.....	218
	References	218
Chapter 6.	Continuous Polynomial Kalman Filter	219
	Introduction	219
	Theoretical Equations	219
	Zeroth-Order or One-State Continuous Polynomial Kalman Filter	221
	First-Order or Two-State Continuous Polynomial Kalman Filter	227
	Second-Order or Three-State Continuous Polynomial Kalman Filter	232
	Transfer Function for Zeroth-Order Filter	238
	Transfer Function for First-Order Filter.....	243
	Transfer Function for Second-Order Filter	248
	Filter Comparison	251
	Summary.....	255
	References	255
Chapter 7.	Extended Kalman Filtering	257
	Introduction	257
	Theoretical Equations	257

	Drag Acting on Falling Object	259
	First Attempt at Extended Kalman Filter	261
	Second Attempt at Extended Kalman Filter	274
	Third Attempt at Extended Kalman Filter	284
	Summary.....	291
	References	291
Chapter 8.	Drag and Falling Object	293
	Introduction	293
	Problem Setup	293
	Changing Filter States	309
	Why Process Noise Is Required	311
	Linear Polynomial Kalman Filter	320
	Summary.....	329
	References	329
Chapter 9.	Cannon-Launched Projectile Tracking Problem	331
	Introduction	331
	Problem Statement	331
	Extended Cartesian Kalman Filter	334
	Polar Coordinate System	349
	Extended Polar Kalman Filter	354
	Using Linear Decoupled Polynomial Kalman Filters	367
	Using Linear Coupled Polynomial Kalman Filters	376
	Robustness Comparison of Extended and Linear Coupled Kalman Filters	385
	Summary.....	393
	Reference	394
Chapter 10. Tracking a Sine Wave	395	
	Introduction	395
	Extended Kalman Filter	395
	Two-State Extended Kalman Filter with a Priori Information..	408
	Alternate Extended Kalman Filter for Sinusoidal Signal	417
	Another Extended Kalman Filter for Sinusoidal Model	431
	Summary.....	441
	References	441
Chapter 11. Satellite Navigation.....	443	
	Introduction	443
	Problem with Perfect Range Measurements	443
	Estimation Without Filtering	447
	Linear Filtering of Range	453
	Using Extended Kalman Filtering	455
	Using Extended Kalman Filtering with One Satellite	465
	Using Extended Kalman Filtering with Constant Velocity Receiver	474

Single Satellite with Constant Velocity Receiver	479
Using Extended Kalman Filtering with Variable Velocity Receiver	493
Variable Velocity Receiver and Single Satellite	505
Summary	513
References	513
Chapter 12. Biases	515
Introduction	515
Influence of Bias	515
Estimating Satellite Bias with Known Receiver Location	519
Estimating Receiver Bias with Unknown Receiver Location and Two Satellites	525
Estimating Receiver Bias with Unknown Receiver Location and Three Satellites	533
Summary	544
Reference	547
Chapter 13. Linearized Kalman Filtering	549
Introduction	549
Theoretical Equations	549
Falling Object Revisited	552
Developing a Linearized Kalman Filter	556
Cannon-Launched Projectile Revisited	569
Linearized Cartesian Kalman Filter	570
Summary	583
References	585
Chapter 14. Miscellaneous Topics	587
Introduction	587
Sinusoidal Kalman Filter and Signal-to-Noise Ratio	587
When Only a Few Measurements Are Available	595
Detecting Filter Divergence in the Real World	606
Observability Example	618
Aiding	629
Summary	642
References	646
Appendix Fundamentals of Kalman-Filtering Software	647
Software Details	647
MATLAB®	648
True BASIC	654
Reference	662
