

Integrated Navigation and Guidance Systems

By Daniel J. Biezad

Table of Contents

Navtech Part # 1146

Preface	xi
Acknowledgments	xiii
Nomenclature	xv
Chapter 1. Navigation over Earth's Surface	1
1.1 Basic Principles of Navigation and Position Fixing	1
1.2 Air Navigation Radio Aids	5
1.3 Flight Management for Situational Awareness	10
1.4 Closure	13
Chapter 2. Newton's Laws Applied to Navigation	15
2.1 Math Tools	16
2.2 Geodetics and Basic Reference Frames	20
2.3 Simplified Aerospace Vehicle Equations	25
2.4 Fundamental Navigation Equation	29
2.5 Inertial Navigation System Solution-A Preview	32
2.6 Global Positioning System Solution-A Preview	35
2.7 Closure	38
Chapter 3. Inertial Navigation Sensors and Systems	39
3.1 Aircraft Gyroscopic Flight Instruments	40
3.2 Inertial Instrumentation	45
3.3 Inertial Platform Mechanizations	53
3.4 Attitude-Heading Reference Systems	70
3.5 Closure	71
Chapter 4. Concept of Uncertainty in Navigation	73
4.1 Inertial Navigation System Error Propagation Equations	74
4.2 Probability Concepts in Navigation	82
4.3 Least Squares	91
4.4 Closure	93
Chapter 5. Kalman Filter Inertial Navigation System	
Flight Applications	95
5.1 Preliminaries	96
5.2 Kalman Filter: Discrete Case Derivation	97
5.3 Kalman Filter Divergence	101

5.4 Aided Inertial Navigation System and the Inertial Navigation System Error Budget	105
5.5 Closure	107
Chapter 6. Global Positioning System	109
6.1 Principles of Operation	110
6.2 Global Positioning System Segments	122
6.3 Selective Availability	132
6.4 Global Positioning System Error Sources and Error Modeling	134
6.5 International Satellite Navigation Systems	135
6.6 Closure	137
Chapter 7. High Accuracy Navigation Using Global Positioning System	139
7.1 Global Positioning System Aiding Inertial Navigation Systems ...	140
7.2 Differential Global Positioning System	143
7.3 Wide Area Augmentation	146
7.4 Closure	148
Chapter 8. Differential and Carrier Tracking Global Positioning System Applications	151
8.1 Review of the Kinematic Carrier-Phase Methodology	151
8.2 Aircraft Precision Approach and Landing Using Differential Global Positioning Systems	156
8.3 Aircraft and Spacecraft Attitude Control	160
8.4 Air Traffic Control	161
8.5 Test Ranges	162
8.6 Closure	164
Chapter 9. Flight Testing Navigation Systems	165
9.1 Testing Autonomous Inertial Systems	165
9.2 Inertial Navigation System Flight Tests	165
9.3 Testing Integrated Navigation Systems	176
9.4 Closure	178
Chapter 10. Navigation Computer Simulations	181
10.1 Installation of AINSBOOK on Your Personal Computer	181
10.2 AINSBOOK Inertial Navigation System Error Analysis Simulation	182
10.3 AINSBOOK Kalman Filter Simulation	193
10.4 Closure	206
Appendix A Abbreviation and Acronyms	209
Appendix B Discussion Questions for Integrated Navigation and Guidance Systems	213
Appendix C Web Sites by Chapter	219
References	221
Index	227
