

Notice: SF-3050 End of Life

The SF-3050 GNSS Receiver is no longer in production with immediate effect.

Limited quantities of a variety of accessories remain available while supplies last. Please contact your account manager prior to submitting a PO for SF-3050 components which are discontinued. PO's which are submitted prior to account manager review of parts availability and approval will be rejected.

Most of these parts are no longer available from our suppliers. However, should you have a requirement over and above our remaining available inventory and our suppliers are able to provide parts, we may be able to address this need for you. Quantity, price, payment, and delivery terms will very likely vary from those in our price list and will all be subject to non-cancellable terms and conditions. These terms will need to be agreed through your account manager prior to an order being accepted.

A few components are carried over to the SF-5050 GNSS Receiver (announced separately) which replaces the SF-3050 product line.

Warranty/Non-Warranty RMA parts are limited. Refer to the updated Price Book Warranty section of the new Price Book effective 1 Feb 19 for details on the RMA exchange policies (the Price Book will accompany the SF-5050 announcement).

Please refer to the table below to identify accessory part changes between the SF-3050 and SF-5050.
