

# Vector™ V320™ GNSS Compass

All-in-one Professional Heading and Positioning Receiver

key features

- Simple all-in-one RTK-capable heading solution
- Accurate heading with a precise baseline
- Dual frequency GPS/GLONASS/BeiDou RTK capable
- Maintain heading and position lock when more of the sky is blocked
- RTK, L-Band DGNSS, and SBAS capable
- COAST technology maintains differentially-corrected positioning for 40 minutes or more after loss of differential signal
- Integrated gyro and tilt sensors deliver fast start-up times and provide heading updates during temporary loss of satellites

Vector™ V320™ is the first all-in-one multi-frequency, multi-constellation GNSS smart antenna, which provides RTK level position and precise heading. Using Hemisphere's patented Eclipse™ GNSS technology, V320 is a strong addition to our VectorV family. The rugged IP69K design housing is sealed for the harshest environments. It incorporates fixed and pole mounting capability for both marine and land applications. The Vector V320 series are suitable for both dynamic positioning and professional marine surveys, as well as for machine control and other challenging applications.

The Vector V320 receiver, this all-in-one smart antenna, can be conveniently installed in multiple vessels and environments. With a set separation, V320 will consistently provide accurate position and heading accuracy. The Vector V320 uses L-Band and SBAS (WAAS, EGNOS, MSAS, etc.) for differential GPS position.
