AsteRx SB ProDirect is a multi-constellation, multi-frequency GNSS receiver with dual antenna GNSS heading functionality. Its compact and rugged housing is tailored for effortless integration in machine automation applications.

KEY FEATURES

- ▶ **All in view, multi-constellation, multi-frequency satellite tracking**
- ▶ **Sub-degree GNSS heading & pitch or heading & roll**
- ▶ **AIM+ Interference monitoring and mitigation function**
- ▶ **GNSS+ algorithms guaranteeing reliable performance**
- ▶ **Compact, yet rugged design**

Reliable heading performance

With dual-antenna input, AsteRx SB ProDirect provides precise, reliable and positioning independent heading combined with centimeter-level RTK. GNSS heading provides unmatched performance in both static and dynamic conditions removing the reliance on vehicle dynamics or magnetic sensors.

Feature-rich in a compact design

Simultaneous multi-constellation, multi-frequency tracking combined with the GNSS+ toolset and high-update rate, low-latency output mean that AsteRx SB ProDirect is ideally suited for any space-constrained industrial application under any conditions.

Ease of integration

The AsteRx SB ProDirect integrates seamlessly into any system thanks to fully documented interfaces, commands and data messages. Septentrio's open interfaces and software tools (WebUI, RxTools) make it easy to integrate, configure and control AsteRx SB ProDirect.
