

CPDC2X1

2X1 GPS Combiner Technical Product Data

Features

- Precise Amplitude Balance
 - Less than 1 dB variation between ports.
- Flat Group Delay
 - Less than 1ns variation between L1 and L2.
- Low Insertion Loss
 - -4.0 dB loss is typical across all operating frequencies.
- Wide Accepted Frequency Range
 - Accepts signals from the entire L-Band, covering all major GNSS constellations.
- Matched Phase Balance
 - Less than 2° of variation between ports.

Description

The **CPDC2X1** GPS Combiner (GNSS Combiner) is a two input, one output device. The frequency response covers the entire L-band (all GNSS Frequencies) with excellent flatness. In the standard configuration, DC is passed from a connected GPS device through the combiner to both inputs (antenna ports). The connected GPS device or receiver will continue to maintain a GPS lock in the event of an antenna failure. Contact GPS Networking Technical Support for any questions regarding standard configurations or special configurations at salestech@gpsnetworking.com or 1-800-463-3063.

Use Cases

- Combining a signal from two GPS antennas to provide redundancy in case of antenna failure.
- Combining a signal from two GPS antennas to protect against environmental interruptions.
- GNSS-optimized signal combination for laboratory test and measurement.
 - 37% less loss than a standard resistive combiner.

CPDC2X1

Electrical Specifications, TA=25°C

General Specification

Parameter	Notes	Min	Typ	Max	Units
Frequency Range	Covers all major GNSS constellations.	1.1		1.7	GHz
Characteristic Impedance	Unused ports should be terminated with 50Ω loads.		50		Ω

GPS L1 & L2 RF Specification ⁽¹⁾

Parameter	Notes	Min	Typ	Max	Units
Input SWR	Input Standing Wave Ratio: S11			2.0:1	-
Output SWR	Output Standing Wave Ratio: S22		1.6:1	2.0:1	-
Insertion Loss	The loss that occurs from the input port to any output port: S21	-3.0	-4.0	-5.0	dB
Gain Flatness	The difference in loss or gain between the L1 and L2 frequencies.			1.0	dB
Amplitude Balance	The difference in gain or loss between each output port.		0.1	1.0	dB
Phase Balance	The difference in phase variation between each output port.		1.5	2.0	deg
Isolation	The amount of attenuation between two output ports.		L1:24.7 L2:18.7		dB
Group Delay Flatness	The difference in signal delay between the L1 and L2 frequencies.			1.0	ns

(1): Performance is slightly reduced around GPS L5. If working on sensitive L5 applications, please request performance data.

External Power Options (Networked Option)	
Source Voltage Options	Style
Voltage Input	
110VAC	Transformer (ITA Type A Wall Mount)
220VAC (Euro)	Transformer (ITA Type C Wall Mount)
240VAC (United Kingdom)	Transformer (ITA Type G Wall Mount)
Customer Supplied DC 9-32 VDC	MIL-DTL-5015 10SL DC Connector (Includes Mate)
Output Voltage Options ⁽²⁾	Max Current out For Corresponding Vout
DC Voltage Out	
3.3V	110mA
5V	130mA
9V	140mA
12V	180mA
15V	220mA
Custom	Custom
Standard DC Configuration without External Power Option	
All ports pass DC	
200Ω loads standard for all DC Blocked outputs	
Standard DC Configuration with any External Power Option (AC/DC or Military DC)	
All DC Blocked Outputs feature 200Ω load in standard configuration	
User selected output DC voltage	
RF Connector Options	
Connector Options	Charge
Connector Style	
Type N-female	No Charge
Type SMA-female	No Charge
Type TNC-female	No Charge
Type BNC-female	No Charge
Other	Contact GPS Networking

(2): With Network Option, any RF port (input or output) can be specified to Pass DC or Block DC

CPDC2X1

Part Number Configuration

Network Option (External Power Supply)
Requires 'N', Output Voltage and Power Type

Hermetically Sealed:

HS = Hermetically Sealed; **Blank** = Std

EMI Shielded (Include Weatherproofed):

E = EMI Shielding; **Blank** = Std

Weatherproofed:

W = Weatherproofed; **Blank** = Std

Network Option:

N = External Power; **Blank** = No External Power

Combiner Pass DC:

CPDC = Combiner Pass DC to both inputs

Combiner Type:

2X1 = 2 Inputs, 1 Output

Connector Options (Type Female Standard):

N = N type; **S** = SMA; **T** = TNC; **B** = BNC

DC Output Voltage (**only with Network Option**):

3.3, 5, 9, 12, 15, XX (Custom: "XX")

Source Voltage (**only with Network Option**):

110=110VAC, **220**=220VAC (2 prong Euro), **240**=240VAC (3 prong UK),
MC – Military DC Connector (User supplies DC voltage range 9-32VDC)

(Military DC Mating Connector is included standard with the MC power option)

CPDC2X1

Performance

CPDC2x1 Standard Gain Typical

Each CPDC2X1 ships with a test sheet that verifies critical performance characteristics, such as gain, input VSWR, and amplitude balance; a typical VNA test sheet is shown below.

Mechanical

Mechanical Dimensions:
 Depth: 1.3"
 Height: Body: 2.5"
 Baseplate: 3.25"
 Width: 2.5"
 Dimensions listed above do not include connectors
 Weight: 10.2oz (289g) MAX
 Maximum weight is with female N-connector option
 Weight will vary by connector type
 Operating Temperature Range: -57°C to +87°C
 Housing and Baseplate Finish: Electroless Nickel Plated (MIL-C-26074C, Class 1 0.0001-0.0003 MAX)
 Lid Finish: Anodize, Type II, Class 2, Black, per MIL-A-8625

Female N connectors shown, other options available
 MC - Military DC connector shown, other options available
 EMI shielding may increase dimension by 0.02 inches per axis

CPDC2X1-N

Passive 2X1 GPS Combiner

Tolerances:
 X ± 0.030
 XX ± 0.015
 XXX ± 0.005
 Angle ± 1°

7-2-21 MM Scale: 1:2 Rev: 1 Sheet 1 of 1 Units are inches and degrees
