

GNSS-302L-A

USER GUIDE

GM-14915158

Rev 3

February 2019

The GNSS-302L-A is an active GNSS antenna that receives the GPS L1 1575.42 MHz frequency, GLONASS L1 1602 – 1606 MHz frequencies, GPS L2 1227.60 MHz frequency, GLONASS L2 1245 – 1260 MHz frequencies and L-Band 1525 – 1556 MHz frequencies.

This guide provides the basic information you need to install and begin using your new antenna.

ADDITIONAL EQUIPMENT REQUIRED

- A device with an antenna input port that both receives the RF signal and provides 3.8 - 6.0 VDC to the antenna is required for the GNSS-302L-A. NovAtel GNSS receivers provide the necessary power through their antenna RF connectors.
- Coaxial cable with a male TNC connector

INSTALLING THE ANTENNA

The integrator of this antenna is responsible for ensuring antenna installation meets all the overall integrated system requirements.

Refer to Section 307 of www.faa.gov/documentLibrary/media/Advisory_Circular/AC%2043.13-2B.pdf for information about antenna bonding in aircraft applications.

Both the input DC power and the output RF signal use a single coaxial cable connected to the antenna's TNC female connector.

The antenna attaches to a surface with an ARINC-743 bolt pattern. Four screws pass through the antenna housing.

To install the antenna:

1. Install the supplied o-ring into the groove on the antenna base.

User supplied o-ring grease can be used to hold the o-ring in the groove during installation.

2. Predrill the mounting holes and the connector clearance hole on the mounting surface. See the *Mechanical Drawings* section for mounting pattern details.

Contact NavtechGPS for product details. www.NavtechGPS.com
+1-703-256-8900 • 800-628-0885 • info@navtechgps.com

- Use the four supplied mounting screws to attach the antenna to the mounting surface. The o-ring compresses and creates a seal between the surface and the antenna.

NovAtel recommends thread-locker (not included) on the mounting screws.

Ref. #	Description
1	Antenna
2	Countersink screws
3	Mounting surface
4	O-ring
5	Pre-drilled mounting holes

- Remove the dust cap from the antenna's TNC connector.
- Attach the coaxial cable's male TNC connector to the antenna's TNC connector.

Ref. #	Description
1	Mounted antenna
2	Mounting surface
3	TNC connector
4	Coaxial cable

6. Attach the other end of the coaxial cable to the antenna input port on the receiving device. The receiving device must be equipped to provide power as detailed in the *SPECIFICATIONS* section of this guide. All NovAtel GNSS receivers provide the necessary power through the antenna RF connectors.

This graphic provides examples of where the antenna may be located on an aircraft or vehicle (not to scale).

ANTENNA CARE

The GNSS-302L-A is designed to withstand the elements, including rain, snow and dust. However, to ensure that the antenna performs optimally, keep the radome clean and brush off any ice or snow. In addition, ensure the TNC connector remains clean and dry and replace the dust cap when a cable is not connected.

Beamwidth (3 dB)	100°	150°	105°	115°	100°	145°	100°	110°	95°	145°
LNA gain (typical)	26 dB		30 dB		26 dB		30 dB		33 dB	
Polarization	Right-hand circular									
Noise figure (typical)	3.0 dB									
Nominal impedance	50 Ω									
VSWR	< 2.0 : 1									
POWER										
Input voltage	3.8 - 6.0 VDC									
Current (typical)	60 mA @ 5 V									
PHYSICAL										
Dimensions	7.62 cm (3.00") Wide x 11.938 cm (4.70") Long x 2.611 cm (1.028") High									
Weight	224 g (7.9 oz.)									
ENVIRONMENTAL										
Maximum altitude	21,336 m (70,00 ft.)									
Operating/Storage temperature	-40°C to +85° C (-67°F to +185°F)									
Vibration	>30 G									
Designed to meet these standards	DO-160D, MIL-C-5541, MIL-E-5400, MIL-I-45208A and MIL-STD-810

PHASE CENTER

Refer to the *Mechanical Drawings* before reading this section.

HEIGHT = Vertical phase center offset from antenna reference point or antenna reference plane (ARP)

For relative offset numbers and phase center variation (PCV) tables, please visit the U.S. National Geodetic Survey (NGS) website at www.ngs.noaa.gov/ANTCAL/. Look for ANTCOM ACCG5ANT_42AT1.

For absolute offset numbers and to download PCV tables, please visit the GEO++ website at www.geopp.com.

When using either of the websites mentioned above, look for the NovAtel listing of your antenna model **and** its hardware revision.

Please check our website for updates to this manual at www.novatel.com/Downloads/docupdates.html and the websites mentioned above.

If you need any further advice on this matter, please visit our website at www.novatel.com. Other methods of contacting Customer Service can be found on the last page of this guide.

WEEE

If you purchased a GNSS-302L-A antenna in Europe, return it to your dealer or supplier at the end of its life. The objectives of the European Community's environment policy are, in particular, to preserve, protect and improve the quality of the environment, protect human health and utilise natural resources prudently and rationally. Sustainable development advocates the reduction of wasteful consumption of natural resources and the prevention of pollution. Waste electrical and electronic equipment (WEEE) is a regulated area. Where the generation of waste cannot be avoided, it should be reused or recovered for its material or energy. WEEE products may be recognized by their wheeled bin label () .

See www.novatel.com/products/compliance/environmental-compliance/ for more information.

ROHS

The GNSS-302L-A is compliant with the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive 2011/65/EU.

WARRANTY POLICY

NovAtel Inc. warrants that its Global Navigation Satellite System (GNSS) products are free from defects in materials and workmanship, subject to the conditions set forth on our web site: www.novatel.com/products/warranty.

GNSS Antenna™ Modules:	One (1) Year
Cables and Accessories:	Ninety (90) Days

RETURN INSTRUCTIONS

To return products, refer to the instructions found under the Return Policy Tab on the warranty page: www.novatel.com/products/warranty.
