

Table of Contents
**Global Positioning System:
Signals, Measurements and Performance
Second Edition**
By Pratap Misra and Per Enge

Part #2500-2

Introduction

A Brief History of Navigation
Methods of Radionavigation
Radionavigation Systems

GPS in 2005: An Overview

Objectives, Policies, and Status
System Architecture
Signals
Receivers, Measurements, and Performance
Differential GPS (DGPS)
Civil Applications

Future Global Navigation Satellite Systems

Spreading Codes and Ranging Signals: An Overview
GPS Modernization
GLONASS and Galileo
Interoperability of GPS, GLONASS, and Galileo
GPS+GLONASS+Galileo Performance

GPS Coordinate Frames, Time Reference, and Orbits

Global Coordinate Systems
Time References and GPS Time
Satellite Orbits and Satellite Position Determination
GPS Satellite Constellation and Visibility Displays

GPS Measurements and Error Sources

Measurement Models
Control Segment Errors: Satellite Clock and Ephemeris
Signal Propagation Modeling Errors
Measurement Error: Empirical Data
Combining Code and Carrier Measurements
Error Mitigation: Differential GPS (DGPS)

Continued

PVT Estimation

Position Estimation with Pseudoranges
Position and Velocity from Pseudorange Rates
Time Transfer

Precise Positioning with Carrier Phase

Carrier Phase and Integer Ambiguity Resolution: A Simple Model
Carrier Phase Measurements and Precise Positioning
Resolving Ambiguities One at a Time
Resolving Ambiguities as a Set: Search Techniques
Three-Frequency Measurements

Signals and Linear Systems

Convolution
Transfer Functions and Basis Functions
Fourier Series
Fourier Transforms
Random Signals
Laplace Transforms

GPS Signals

Civil Signal on L1
Auto-correlation
Cross-correlation and Channel Sharing
Maximal Length Linear Shift Register Sequences
Gold Codes of Length 31 and 1023
Power Spectral Density
Narrowband Radio Frequency Interference
P(Y) Codes on L1 and L2
New Civil Signals for GPS
Binary Offset Carrier Signals

Signal-to-Noise Ratio and Ranging Precision

Signal Path Loss and Transmit Antenna Gain
Received Signal Power and Receiver Antenna Gain
Noise Analysis of a GPS Receiver
Delay Lock Loops and Ranging Precision
Ranging Precision in the Presence of White Noise
Ranging Precision in the Presence of Signal Reflections

Continued

Signal Conditioning and Acquisition

Introduction

Signal Conditioning

Signal Acquisition

Statistical Analysis of Signal Acquisition

Signal Tracking

Overview of a Signal Tracker

Delay Lock Loops

Phase Lock Loops

Coping With Radio Frequency Interference and Signal Obstructions

Terrestrial Radio Propagation

Antennas

Assisted GPS

Inertial Aiding

Tone Interference and Adaptive A/D Converters

Global Positioning System: Signals, Measurements and Performance

Second Edition

By Pratap Misra and Per Enge

Part #2500-2
